Pazopanib (Votrient®)
(“paz OH pa nib”)

How drug is given: by mouth

Purpose: to stop the growth of cancer cells in kidney cancers, soft tissue sarcomas, and other cancers

How to take the drug by mouth

• Take dose at least 1 hour before food or at least 2 hours after food.

• Swallow each tablet whole; do not crush or chew them. If you are unable to swallow the tablet, the pharmacist will give you specific instructions.

• If you miss a dose, take it as soon as possible. However, if it is almost time for your next dose, skip the missed dose and go back to your regular dosing schedule. Do not double dose.

• Pazopanib can interfere with many drugs, which may change how this works in your body. Talk with your doctor before starting any new drugs or supplements, including over-the-counter drugs, natural products, herbal supplements (such as St. John’s wort), and vitamins.

• Do not drink grapefruit juice or eat grapefruit. Consuming these may increase the amount of medication in your body and worsen side effects.

• Wash hands after taking the medication. Avoid handling crushed or broken tablets.

Storage

• Store at room temperature, away from heat and moisture. Keep this medicine in its original container, out of the reach of children and pets.

Things that may occur during treatment

1. Your blood pressure may go up. If this happens, you may be given medications to help with this. If you have headache or dizziness, tell your doctor or nurse right away.

2. Some patients may have mild nausea. You may be given medicine to help with this.

3. Loose stools or diarrhea may occur within a few days after the drug is started. You can take loperamide (Imodium A-D®) to help control diarrhea. You can buy this at most drug stores. Be
4. Some patients may feel very tired, also known as fatigue. You may need to rest or take naps more often. Mild to moderate exercise may also help you maintain your energy.

In some cases, fatigue may be a sign of hypothyroidism. This is a condition in which your thyroid gland does not produce enough thyroid hormone. If you experience this, and have other symptoms, such as cold intolerance or modest weight gain, talk to your doctor or nurse.

5. You may feel pain or weakness in your joints or muscles. If these bother you, ask your doctor or nurse what type of drugs you may use to help with this pain.

6. Changes in your blood sugar may occur.

7. You may get some hair thinning and/or changes in hair color.

8. Skin changes, such as dryness or a rash on your body, may occur. Ask your doctor or nurse what lotions or creams you may use.

9. Your blood cell counts may drop. This is known as bone marrow suppression. This includes a decrease in your:
   - Red blood cells, which carry oxygen in your body to help give you energy
   - White blood cells, which fight infection in your body
   - Platelets, which help clot the blood to stop bleeding

If you have a fever of 100.5°F (38°C) or higher, chills, a cough, or any bleeding problems, tell your doctor or nurse right away.

10. Your liver may be affected by this drug. Labs may be drawn to monitor your liver function.

11. Fertility and related precautions:
   - It is very important to use birth control if you are having sex, because this drug could be harmful to an unborn baby.
   - Men can become sterile and may want to think about sperm banking prior to chemotherapy.
   - For women, your period (menstrual cycle) may not be regular for a while or may stop completely and you may not be able to get pregnant.
   - Women should not breast-feed while receiving this drug.
   - If you are concerned about any of this, please talk with your doctor or nurse.

The above information includes some, but not necessarily all, of the possible side effects of this medication. The side effects in this teaching sheet may not be the same ones you experience. Your side effects may be different, depending on how often you receive treatment (your schedule) and how much you receive each time (your dosage). Side effects may also vary if you take other medications. Please talk
with your doctor or nurse if you have questions about possible side effects you may experience. This document should not take the place of conversations with members of your health care team.

If you experience any significant change in your health during or after treatment, contact a member of your health care team right away.

Managing your oral chemotherapy schedule at home can be challenging. To help you with this, consider using tools to help you keep track of your schedule and any side effects you may have. You can find these tools online at www.dana-farber.org/OralChemoDiary.
