Wireless Internet Access for Dana-Farber Visitors

Wi-Fi access is available for Dana-Farber visitors in all patient areas. To access the Internet while you are here:

1. Connect to the **phspiaguest** wireless network.

2. Open your web browser (Internet Explorer, Firefox, Safari, etc.) and click “accept” at the **DFCI Patient and Family Internet Access** screen.

3. After you click “accept,” you should be connected to the Internet and can begin browsing the web.

If You Need Help

If you have any difficulty connecting to the network, please ask your clinic staff to call the **Information Services Help Desk**.

*Please note that the Help Desk system can only process requests from staff members, so visitors should not call the line directly.*
