

## **Notice to All Medicare Beneficiaries**

This document explains your co-insurance obligations when you receive medical care at Dana-Farber Cancer Institute at Londonderry. Co-insurance refers to that portion of your bill not covered by Medicare. At each visit, you will incur a co-insurance liability for non-physician services, including nursing and pharmacy-related infusion care. In addition, as directed by Medicare, if you have an appointment with a physician you will have a separate co-insurance payment.

We may not know ahead of time which services you will receive during any particular visit because they will depend, in part, on the results of the tests and evaluations that are done that day. As a result, it is difficult to estimate your total co-insurance obligation for any single visit. However, based on Medicare billing requirements, if you were to receive similar services in a physician's office, as opposed to at Dana-Farber Cancer Institute at Londonderry, you would only have one co-insurance payment for each visit.

If you have Medicare supplemental insurance, some (or all) of your co-insurance obligations may be covered by such insurance.

If you have any questions or concerns about your co-insurance obligations with respect to services provided by Dana-Farber Cancer Institute at Londonderry, please feel free to contact us at (877) 332-4645.
