

FELLOW: Matthew J. Emmett, MD, PhD
HOMETOWN: Philadelphia, PA
MEDICAL SCHOOL: University of Pennsylvania
RESIDENCY: MGH

Matthew Emmett is originally from Philadelphia, PA. He obtained a BA in Biology and MS in Molecular and Cellular Biology at Johns Hopkins University and an MD and PhD at the University of Pennsylvania. He completed his doctoral dissertation with Dr. Mitchell Lazar studying the epigenomic and transcriptional regulation of metabolism.

Following medical school, he completed his residency in Internal Medicine at the Massachusetts General Hospital. While at MGH, he has conducted clinical research in GI oncology with Drs. Sam Klempner, Joseph Franses, and David Ting. He is passionate about exploring the intersections of cancer cell epigenomics, metabolism, and the tumor environment. He intends to become a basic science investigator with clinical focus in GI oncology.

Outside of work, he enjoys time with his wife and family, dog, watching baseball, and exploring both the outdoors and New England.
