

**FELLOW:** Emma C. Fink, MD, PhD  
**HOMETOWN:** Ontario, NY  
**MEDICAL SCHOOL:** Harvard Medical School  
**RESIDENCY:** BWH

Emma is originally from a small town outside of Rochester, NY. She attended Amherst College, where she double majored in Biology and Chemistry. She then came to the Harvard-MIT MD PhD program where she completed her MD in the HST program and PhD in the BBS program. For her PhD, she worked with Dr. Benjamin Ebert on the mechanism of lenalidomide in del(5q) myelodysplastic syndrome and created a lenalidomide-sensitive mouse model to enable *in vivo* studies. She continued her clinical training at Brigham and Women's Hospital, where she completed her residency in Internal Medicine.

In the future, she hopes to be a laboratory-based physician scientist studying cancer pathogenesis and targeted therapeutics, likely in liquid malignancies. She is looking forward to learning more about all areas of oncology to guide her choice of future clinical practice and research questions.

In her free time, she enjoys spending time in the outdoors through tennis, horseback riding, hiking, biking, and skiing. She also enjoys traveling (in non-COVID times) and cooking.
